REASONS FOR ALLOWANCE

1. The following is a statement of reasons for the indication of allowable subject matter: In claim 1, Applicant claims a second reactor which traps soot exhausted from a syngas producing reactor which operates at steady state and gasifies the majority of the trapped soot in the second reactor with the by-products of the syngas producing reactor in order to regenerate the filter/apparatus that traps soot. The prior art also teaches a second reactor which traps soot generated in a syngas producing reactor and gasifies said soot to remove the soot from the filter/apparatus that traps soot. However, the prior art does not teach or suggest a second reactor which operates at steady state and gasifies a majority of the soot with the by-products of the syngas producing reactor at the same rate at which the second reactor traps the soot. Furthermore, the prior art teaches regenerating/removing the soot from the second reactor by shutting down the second reactor and using a source other than the byproducts of the syngas producing reactor to gasify the soot..

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
